Course Highlight:

Supply Chain Strategies are the critical backbone to business survival today because the decisions impact corporate and customer financials and market share domestically and globally.

Supply Chain Management improves the coordination and relationship between Suppliers, Producers, and Customers. It must be kept at a high level of organization to be successful in today's global economy. Goods and services are now pieced together from all over the world, and this process can be hectic and complicated if not managed correctly.

With Supply Chain Management your company and employees will be on target to lower costs, improve efficiency, and increase customer satisfaction. This course will provide you with an understanding of how Supply Chain Management can improve and help almost any type of business.

This Certificate course in Supply Chain Management offers the critical linkage between demand creation and the fulfillment of demand. There is also a heightened need for logistics and supply chain professionals to develop cross-functional awareness, and deep (logistics-focused) knowledge and abilities.
